

EVAPORATED, CONDENSED AND DRY MILK

REPORT FOR JUNE 1966

July 29, 1966

PRODUCTION

EVAPORATED AND CONDENSED MILK: June evaporated whole milk production is estimated at 195 million pounds by the Crop Reporting Board. This is 7 percent above June 1965 and 13 percent less than the 1960-64 average for the month. Output in the first 6 months of the year, at 937 million pounds, exceeded the first half of 1965 by 5 percent.

Production of canned sweetened condensed whole milk in June was 11 million pounds, more than two times the production in June a year ago, 66 percent above average, and the largest quantity for the month since 1948. First half of 1966 output totaled 59 million pounds -- 30 percent more than for the same period last year.

^{1/} Revised.

NOTE: Attention is called to the revisions in production estimates of dry, condensed and evaporated milk for 1966 and the enumerations for 1965 as shown on pages 9 to 11. Revised prices paid for milk used in the production of evaporated or canned condensed milk for 1965 will be published in a later issue

1/ Revised.

DRY MILK: Nonfat dry milk production during June (spray and roller process combined), totaled 192 million pounds -- 14 percent less than a year earlier, 17 percent below average, and the smallest production for June since 1957. Cumulative production of 948 million pounds during the first half of this year was 24 percent lower than for the corresponding period last year.

Production of spray process nonfat dry milk, at 185 million pounds, was 14 percent less than in June 1965 and 15 percent below average. January through June production totaled 912 million pounds, a decrease of 24 percent from the first 6 months of last year.

Roller-dried nonfat production in June at 7.5 million pounds, was 18 percent less than a year earlier and 52 percent below average.

Production of dry whole milk at 8.9 million pounds was 15 percent more than in June a year ago and 14 percent higher than average. Production for the first 6 months at 48 million pounds was up 1 percent from a year earlier.

Output of dry buttermilk totaled 8.5 million pounds during June, a loss of 5 percent from a year earlier and 8 percent less than average. January through June production of 45 million pounds was down 14 percent from the same period of 1965.

Production of dry skim milk for animal feed, at 2.5 million pounds, increased 18 percent from June last year but decreased 5 percent from average.

STOCKS, SHIPMENTS, PURCHASES AND PRICES

EVAPORATED AND CONDENSED MILK: Stocks of evaporated whole milk held by reporting manufacturers on June 30, totaled 206 million pounds. This is 3 percent higher than a year earlier but 14 percent below the June 30, 1960-64 average. Holdings of canned sweetened condensed whole milk totaled 8.4 million pounds -- an increase of 5 percent from a year earlier and 21 percent more than average.

Prices paid by condenseries to producers averaged \$3.75 per hundred-weight during June for milk with an average milkfat content of 3.71 percent. This is equivalent to \$1.01 per pound of milkfat -- up 2 cents from May, 15 cents more than June last year, and the highest for the month since 1952.

Whole milk purchases during June, as reported by condenseries for which historical data are available, totaled 387 million pounds and were received from about 45,000 producers. Daily purchases averaged 286 pounds per producer compared with 263 pounds during June last year and the June average of 237 pounds.

Selling prices during June for evaporated whole milk, as reported by manufacturers, averaged \$6.64 per case of forty-eight 14½ oz. cans -- 1 cent per case more than May and 57 cents above June a year ago.

DRY MILK: Manufacturers' stocks of all nonfat dry milk for human consumption on June 30, totaled 139 million pounds -- 10 percent less than on this date in 1965 and 11 percent below average. The inventory of spray-dried product was 136 million pounds compared with 148 million on hand a year earlier and the average of 143 million. Stocks of dry whole milk totaled 8.7 million pounds, an increase of 12 percent from June a year ago, 22 percent above average and the highest for the date since 1958.

Shipments of spray and roller process nonfat dry milk for human use totaled 142 million pounds during June, an increase of 11 percent from May but a decrease of 29 percent from a year earlier. June shipments were the smallest for the month since 1959. Spray process shipments of 138 million pounds were 11 percent more than in May but 28 percent below June 1965. The movement of dry whole milk was 7.5 million pounds compared with 7.6 million during May and 6.8 million during June a year ago. Total shipments of dry buttermilk were 4.8 million pounds, an increase of 9 percent from May but a decrease of 16 percent from a year earlier.

USDA Nonfat Dry Milk Purchases and Payment-In-Kind Activity as Reported by ASCS
 - Delivery basis -

Nonfat dry milk	June 1966	Cumulative	
		April 1, 1965- June 30, 1965	April 1, 1966- June 30, 1966
	<u>Mil. pounds</u>	<u>Mil. pounds</u>	<u>Mil. pounds</u>
Purchases	37.2	295.1	83.1
PIK exports <u>1/</u>	-	41.0	0.6
Combined	37.2	336.1	83.7

1/ Payment-in-kind export certificates issued.

Uncommitted inventories on July 15, 1966 totaled 35.6 million pounds.

Selling prices for nonfat dry milk (spray and roller process combined) averaged 17.4 cents per pound during June compared with 17.2 cents in May and 14.5 cents in June a year ago. Spray process product averaged 17.4 cents in June -- gains of 0.2 cent per pound from May and 2.8 cents from a year earlier. Roller-dried nonfat prices averaged 17.3 cents per pound, a 0.3 cent per pound advance from May and 3.1 cents more than in June 1965.

Dry buttermilk prices (human food and animal feed combined) averaged 18.0 cents during June -- 0.9 cent per pound more than in May and 4.0 cents higher than a year earlier. Dry whole milk prices in all package and container sizes averaged 37.0 cents per pound compared with 36.6 cents per pound in May and 33.3 cents per pound in June a year ago.

Table 12.-Milk bought by condenseries: Quantity bought, and number of producers, June 1966 ^{1/}

Item	Average June 1960-64	June 1965 ^{2/}	June 1966
Milk bought from producers..... pounds	561,163,000	429,169,000	386,525,000
Producers..... number	79,000	54,000	45,000
Average per producer per day... pounds	236.8	263.2	285.6
Change in purchases per producer:			
1966 from 1965 percent	xxxxx	xxxxx	+ 8.5
1966 from 5-year average percent	xxxxx	xxxxx	+20.6

^{1/} Reported milk purchases at those plants (or their receiving stations) with canning equipment for which historical data are available. In some periods a part or all of the milk received at such plants may be used for purposes other than the manufacture of canned milk.

^{2/} Revised.
